Summary

Highly motivated Computer Engineering diploma student with an 81.50% aggregate. Passionate about building full-stack applications and developing complete IoT products—from hardware design to Flutter mobile app and web backend. Currently seeking a 6-month internship in software development.

Education

SVKM's Shri Bhagubhai Mafatlal Polytechnic, Vile Parle — Diploma in Computer Engineering (3rd Year)
Aggregate: 81.50%

St. Francis ICSE School, Borivali — 10th ICSE: 89%

Projects

- TrackLit (IoT + Flutter Project)

Developed a smart IoT-based tracker using ESP32 and Flutter, integrated with Firebase for real-time location tracking and user alerts. Implemented BLE connectivity, and efficient power management.

- AI Call Assistant

Built a Flutter-based voice automation system capable of handling phone calls using AI-driven speech recognition and text-to-speech modules. The assistant automates user responses and logs call data intelligently. (Currently Ongoing Project)

- Digit Recognition Model

Created a neural network model in Python capable of recognizing handwritten digits (0–9) with high accuracy using Random Forest and Cross Validation.

Technical Skills

Languages: Python, Dart, Java, SQL, JavaScript, CSS, C

Frameworks: Flutter, Node.js

Developer Tools: Git, VS Code

Hardware/IoT: ESP32, Raspberry Pi, Arduino
Databases: Firebase, MySQL

Certifications & Achievements

- CERTIFICATION IN ETHICAL HACKING - IIT TECHFEST, 2023
- CERTIFICATION IN ARTIFICIAL INTELLIGENCE - IIT TECHFEST, 2024
- CERTIFICATION IN WEB DEVELOPMENT - CODESOFT

Objective

To leverage my technical expertise in Flutter, IoT systems, and Artificial Intelligence to gain hands-on experience through an internship and contribute to impactful technology-driven solutions.
